PROFESSIONAL SUMMARY

MERN Stack Developer with hands-on experience building production-ready, full-stack applications including a real-time chat platform and a complete e-commerce system with JWT authentication. Proficient in React, Node.js, Express.js, MongoDB, Mongoose, Redux Toolkit, and Socket.IO. Focused on writing clean, scalable code and delivering portfolio-grade projects that reflect real-world engineering practices.

TECHNICAL SKILLS

Frontend: React.js, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, React Router DOM v6

Backend: Node.js, Express.js, REST APIs

Database & ODM: MongoDB, Mongoose

State Management: Redux Toolkit, Context API, Custom Hooks

Authentication: JWT (JSON Web Tokens), bcrypt

Real-time: Socket.IO

API & Testing: Postman, Axios, Thunder Client

Deployment: Vercel, Render, GitHub Pages

Dev Tools: Git, GitHub, VS Code, Vite, npm, Figma

Other: Responsive Design, Chrome Extension APIs, Cloudinary

PROJECTS

Chattrix — Real-Time Chat Application *React · Redux Toolkit · Node.js · Express · MongoDB · Socket.IO*

Production-grade full-stack chat app with real-time messaging and persistent state.

- Architected bi-directional real-time messaging using Socket.IO, supporting live online/offline presence tracking synced to MongoDB.
- Implemented JWT-based authentication with protected routes, persistent Redux state via localStorage, and auto-reconnection on page refresh.
- Built Base64 image upload pipeline integrated with Cloudinary for user profile management.
- Engineered Redux Toolkit store with full state persistence, eliminating session loss across browser refreshes.

Cartify — Full-Stack E-Commerce Platform *React · Node.js · Express · MongoDB · JWT · Tailwind CSS · Vercel*

Complete MERN e-commerce system with authentication, product management, and cart module.

- Built a RESTful API with 3 core modules (Auth, Products, Cart) using Express.js and Mongoose, with JWT-protected endpoints.
- Developed the React frontend with Axios JWT interceptors, AuthContext, CartContext, and dynamic pages for Home, Product Detail, Cart, Login, and Signup.
- Implemented token refresh logic and route guards, reducing unauthorized access errors to zero across all protected routes.
- Deployed frontend on Vercel and backend on Render; conducted full API testing with Postman across 15+ endpoints.

Cartly — Frontend E-Commerce UI

React · Vite · Tailwind CSS v4 · Vercel

Feature-rich frontend-only e-commerce UI focused on advanced React patterns. Live: cartly-zeta.vercel.app

- Built 4 independent React Contexts (Cart, Favorites, Theme, Search) with custom hooks for clean global state sharing across 10+ components.
- Implemented real-time product search and category filters with zero external state libraries, using only React Context and custom hooks.

- Designed and deployed a fully responsive UI with Tailwind CSS v4 to Vercel, achieving consistent rendering across mobile and desktop viewports.

Recipe Finder App

React · Vite · Tailwind CSS · TheMealDB API · React Router DOM v6

Full-featured recipe discovery app with search, favorites, and custom hooks.

- Built a reusable useFetch custom hook and a dedicated API service layer, reducing data-fetching boilerplate by ~60% across 5+ components.
- Architected 8+ reusable React components (RecipeCard, RecipeGrid, FilterBar) with Tailwind CSS responsive layouts.
- Implemented Context API for global favorites and filter state, and React Router DOM v6 for multi-page navigation.

Notes Taking App

HTML · CSS · JavaScript · localStorage · GitHub Pages

Full CRUD notes app with dark/light mode, real-time search, and responsive sidebar.

- Developed complete CRUD functionality with persistent state using localStorage and a real-time search filter.
- Implemented dark/light mode toggle and a responsive sidebar layout; deployed at maaz-afzal.github.io/notes-app.

EDUCATION

BS Computer Science

2024 – Present

University of Engineering & Technology (UET), Jaloza

Relevant Coursework: Operating Systems, Web Technology, Data Science, Database Systems, Software Engineering

LANGUAGES

Urdu — Native **English** — Proficient (Technical & Professional) **Hindi** — Conversational
